Chapter 1: Connections to Algebra. Chapter 2: Properties of Real Numbers. Chapter 3: Solving Linear Equations. Chapter 4: Graphing Linear Equations and Functions ...

College Algebra provides a comprehensive exploration of algebraic principles and meets scope and sequence requirements for a typical introductory algebra course. The modular approach and richness of content ensure that the book meets the needs of a variety of courses. The text and images in this textbook are grayscale.

The author says: "The stories in this collection are an outgrowth of my lamentable childhood, as well as a reflection of those things in life which I found fascinating--in that they could mentally take me away from the horror of my daily life, and at least on the level of imagination offer me something worth waking up each morning for. Thus, the universes in this collection center around outsiders, artists, and freaks (be they natural-born or self-made); some of the stories are interconnected, but also designed to stand alone. I've included afterwords for each to shine additional light on both the works and their cultural personal inspirations. But more than a collection, to me this volume is a glimpse into my creative soul--and as such, it may not be perfect, it might not even be logical, but it is what I am, love it or hate it." Six cutting-edge stories of a bizarre, near-future America, a mix of strange cultures and curious characters, featuring tattoo artists, origami masters, Irezumi, the De Novo Shinkansen, Qatmandude...and the Blue Moon Roach Hotel!"

As in previous editions, the focus in INTRODUCTORY ALGEBRA remains on the Aufmann Interactive Method (AIM). Students are encouraged to be active participants in the classroom and in their own studies as they work through the How To examples and the paired Examples and You Try It problems. Student engagement is crucial to success. Presenting students with worked examples, and then providing them with the opportunity to immediately solve similar problems, helps them build their confidence and eventually master the concepts. Simplicity is key in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully constructed hierarchy of objectives. Each exercise mirrors a preceding objective, which helps to reinforce key concepts and promote skill building. This clear, objective-based approach allows students to organize their thoughts around the content, and supports instructors as they work to design syllabi, lesson plans, and other administrative documents. New features like Focus on Success, Apply the Concept, and Concept Check add an increased emphasis on study skills and conceptual understanding to strengthen the foundation of student success. The Ninth Edition also features a new design, enhancing the Aufmann Interactive Method and making the pages easier for both students and instructors to follow. Available with InfoTrac Student Collections <http://goengage.com/infotrac>.
