This book tells of Mathew B. Brady, a Civil War photographer, with over 300 reproductions of his work.

A favorite classroom prep tool of successful students that is often recommended by professors, the Examples & Explanations (E&E) series provides an alternative perspective to help you understand your casebook and in-class lectures. Each E&E offers hypothetical questions complemented by detailed explanations that allow you to test your knowledge of the topics in your courses and compare your own analysis. Here's why you need an E&E to help you study throughout the semester: Clear explanations of each class topic, in a conversational, funny style. Features hypotheticals similar to those presented in class, with corresponding analysis so you can use them during the semester to test your understanding, and again at exam time to help you review. It offers coverage that works with ALL the major casebooks, and suits any class on a given topic. The Examples & Explanations series has been ranked the most popular study aid among law students because it is equally as helpful from the first day of class through the final exam.

For the first time, this book offers astrologers: Paran Maps and Star Phases for over 60 stars; new insights into the natal use of fixed stars, as well as their use in mundane astrology; extensive appendices of Helical Rising and Acronychal Settinggraphs and tables so that, for any given location, the dates of these risings and settings can be found; a list of 176 stars with their 21st century Ptolemaic precessed positions versus their commonly-considered positions based on Uugh Beg's methods.

Through his specialized techniques and unique style, this photographer became famous for his photos of presidents, generals, and bloody battles fought during the Civil War.
