In this book, eminent educational philosopher Nel Noddings and daughter Laurie Brooks explain how teachers can foster critical thinking through the exploration of controversial issues. The emphasis is on the use of critical thinking to understand and collaborate, not simply to win arguments. The authors describe how critical thinking that encourages dialogue across the school disciplines and across social/economic classes prepares students for participation in democracy. They offer specific, concrete strategies for addressing a variety of issues related to authority, religion, gender, race, media, sports, entertainment, class and poverty, capitalism and socialism, and equality and justice. The goal is to develop individuals who can examine their own beliefs, those of their own and other groups, and those of their nation, and can do so with respect and understanding for others values. Book Features: Underscores the necessity of moral commitment in the use of critical thinking. Offers assistance for handling controversial issues that many teachers find unsettling. Proposes a way for students and teachers to work together across the disciplines. " Brooks and Noddings offer a timely and inspirational guide for teaching critical thinking in American schools. With deep roots in American philosophy and traditions, this book inspires us to teach students to question authority while fostering meaningful conversations about the difficult issues confronting our nation. This book offers a recipe for nurturing the next generation of caring and critical democratic citizens." —Andrew Fiala, professor, California State University, Fresno " Chock-full of contemporary and historical examples, this book offers educators myriad examples of how to help students learn to talk with and listen to others and to understand the fullness of our collective humanity.
