Evaluation of Designed Formulations: Post formulation studies Physical characterization of all the lubricated blends were carried out and found to have good flow properties. The tablets prepared with the plain polymer mixture combination were found to have desired limits of hardness and thickness and complies to weight variation and within the official limits of friability.

diphenhydramine nasal nano-emulgels, having lipophilic nano-sized interior droplets, with better penetration for targeted controlled delivery to mucous membrane. Different diphenhydramine (DPH) nasal nano-emulgels were developed having propylene glycol and olive oil (as permeation enhancers) by using RSM for optimization and then evaluated for physico-chemical characteristics and thermal stability.
