Integrated Production Control Systems By Bedworth D D ...

Because many kinds of systems have to be installed in a plant factory as described above, the system controlling all their instruments is one of the most important components. In the past, self-contained local control systems for individual instruments were common. In the GCN, an integrated control system has been established. Individual control circuits

Computer-integrated manufacturing is the manufacturing approach of using computers to control entire production process. This integration allows individual processes to exchange information with each part. Manufacturing can be faster and less error-prone by the integration of computers. Typically CIM relies on closed-loop
