Journalist Walls grew up with parents whose ideals and stubborn nonconformity were their curse and their salvation. Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children's imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote and couldn't stand the responsibility of providing for her family. When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description.

Fundamentals of Biomechanics introduces the exciting world of how human movement is created and how it can be improved. Teachers, coaches and physical therapists all use biomechanics to help people improve movement and decrease the risk of injury. The book presents a comprehensive review of the major concepts of biomechanics and summarizes them in nine principles of biomechanics. Fundamentals of Biomechanics concludes by showing how these principles can be used by movement professionals to improve human movement. Specific case studies are presented in physical education, coaching, strength and conditioning, and sports medicine.

This is one in a series of manuals for car or motorcycle owners. Each book provides information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so that even a novice can do the work.

This book, by Alan A. Tait, is an examination of VAT. It looks at problems and theoretical options and potential impacts, as well as detailing the practical aspects of implementing new tax structures. The author advances arguments for and against alternative policies and illustrates his study with international examples from Europe, Latin America, Asia, and the Pacific. He suggests that countries can learn from each other's experiences with VAT.

Topics with racial implications have been hotly debated in the psychological literature for most of this century and are often in the news. Graham Richards takes a historical look at how the concepts of "race" and "racism" emerged within the discipline and charts the underlying premises of some famous studies in their social and political contexts. No-one is allowed to be objective in this arena, as opponents will always argue that they are not. This account is bound therefore to be controversial and excite interest whether or not readers agree with Richards' stance.
