Are you interested in learning to build mobile apps with React Native? Already mastered the web and looking to expand into the mobile apps space? If so then this is the article you are looking for...

Your First React Native App. A walkthrough of building a ...

Learn the Basics. React Native is like React, but it uses native components instead of web components as building blocks. So to understand the basic structure of a React Native app, you need to understand some of the basic React concepts, like JSX, components, state, and props. If you already know React, you still need to learn some React-Native-specific stuff, like the native components.
