Prepayment meters are a type of domestic energy meter that requires users to pay for energy before using it. This is done via a smartcard, token or key that can be topped up at a shop or via a...

Prepayment meters and pay as you go energy

A smart prepaid energy metering system to control electricity theft.

Abstract: Power utilities in different countries especially in the developing ones are incurring huge losses due to electricity theft. This paper proposes a prepaid energy metering system to control electricity theft. In this system a smart energy meter is installed in every consumer unit and a server is maintained at the service provider side.

Smart meters - Spark™ - Bringing Energy to Life

Prepaid Electricity Energy Meter is a good concept in which you can recharge its balance, like we do in our mobile phones. In this project we are building a automated system by using Arduino and GSM module. You can recharge the electricity balance through this system, just by sending a SMS. It can also disconnect the home power supply connection, if there is low or zero balance in the system.
