Sultan Mehmet II, known to his countrymen as 'the Conqueror' and to much of Europe as 'the Terror of the World,' was once Europe's most feared and powerful

Ruler. Now, Turkey's most beloved American scholar, John Freely, brings to life this charismatic hero of one of the richest histories in the world. Mehmet was barely twenty-one when he conquered Byzantine Constantinople, which became Istanbul and the capital of his mighty empire. Mehmet reigned for thirty years, during which time his armies extended the borders of his empire halfway across Asia Minor and as far into Europe as Hungary and Italy. Three popes called for crusades against him as Christian Europe came face to face with a new Muslim empire. Revered by the Turks and seen as a brutal tyrant by the West, Mehmet was a brilliant military leader as well as a renaissance prince. His court housed Persian and Turkish poets, Arab and Greek astronomers, and Italian scholars and artists. In the first biography of Mehmet in thirty years, John Freely vividly illuminates the man behind the myths.

Using a wealth of contemporary Ottoman sources, this book recreates the social history of Istanbul, a huge, cosmopolitan metropolis and imperial capital of the Ottoman Empire. Seat of the Sultan and an opulent international emporium, Istanbul was also a city of violence shaken regularly by natural disasters and by the turmoil of sultanic politics and violent revolt. Its inhabitants, entertained by imperial festivities and cared for by the great pious foundations which touched every aspect of their lives, also amused themselves in the numerous pleasure gardens and the many public baths of the city. While the book is focused on Istanbul, it presents a broad picture of Ottoman society, how it was structured and

how it developed and transformed across four centuries. As such, the book offers an exciting alternative to the more traditional histories of the Ottoman Empire.

This book examines the active role of urban citizens in constructing alternative urban spaces as tangible resistance towards capitalist production of urban spaces that continue to encroach various neighborhoods. The collection of narratives presented here brings together research from ten different Asian cities and re-theorises the city from the perspective of ordinary people facing moments of crisis, contestations, and cooperative quests to create alternative spaces to those being produced under prevailing urban processes. The chapters accent the exercise of human agency through daily practices in the production of urban space and the intention is not one of creating a romantic or utopian vision of what a city "by and for the people" ought to be. Rather, it is to place people in the centre as mediators of city-making with discontents about current conditions and desires for a better life.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Ever since 1911, the Solvay Conferences have shaped modern physics. The format is quite different from other conferences as the emphasis is placed on discussion. The 27th edition held in October 2017 in Brussels and chaired by Boris Shraiman continued this tradition and addressed some of the most pressing open questions in the fields of biophysics, gathering many of the leading figures working on a wide variety of profound problems. The proceedings contain the 'rapporteur talks' giving

a broad overview with unique insights by distinguished renowned scientists. These lectures cover the five sessions: 'Intra-cellular Structure and Dynamics', 'Cell Behavior and Control', 'Inter-cellular Interactions and Patterns', 'Morphogenesis', 'Evolutionary dynamics'. In the Solvay tradition, the proceedings also include the prepared comments to the rapporteur talks. The discussions among the participants -- expert, yet lively and sometimes contentious -- have been edited to retain their flavor and are reproduced in full. The reader is taken on a breathtaking ride through a fascinating field which is expanding rapidly and which was for the first time the subject of a Solvay Conference on Physics.
