This global history as the Chinese would write it gives brilliant and unconventional insights for understanding China's role in the world, especially the drive to "Make China Great Again." We in the West routinely ask: "What does China want?" The answer is quite simple: the superpower status it always had, but briefly lost. In this colorful, informative story filled with fascinating characters, epic battles, influential thinkers, and decisive moments, we come to understand how the Chinese view their own history and how its narrative is distinctly different from that of Western civilization. More important, we come to see how this unique Chinese history of the world shapes China's economic policy, attitude toward the United States and the rest of the world, relations with its neighbors, positions on democracy and human rights, and notions of good government. As the Chinese see it, for as far back as anyone can remember, China had the richest economy, the strongest military, and the most advanced philosophy, culture, and technology. The collision with the West knocked China's historical narrative off course for the first time, as its 5,000-year reign as an unrivaled superpower came to an ignominious end. Ever since, the Chinese have licked their wounds and fixated on returning their country to its former greatness, restoring the Chinese version of its place in the world as they had always known it. For the Chinese, the question was never if they could reclaim their former dominant position in the world, but when.

Confucius is perhaps the most important philosopher in history. Today, his teachings shape the daily lives of more than 1.6 billion people. Throughout East Asia, Confucius's influence can be seen in everything from business practices and family relationships to educational standards and government policies. Even as western ideas from Christianity to Communism have bombarded the region, Confucius's doctrine has endured as the foundation of East Asian culture. It is impossible to understand East Asia, journalist Michael Schuman demonstrates, without first engaging with Confucius and his vast legacy. Confucius created a worldview that is in many respects distinct from, and in conflict with, Western culture. As Schuman shows, the way that East Asian companies are managed, how family members interact with each other, and how governments see their role in society all differ from the norm in the West due to Confucius's lasting impact. Confucius has been credited with giving East Asia an advantage in today's world, by instilling its people with a devotion to learning, and propelling the region's economic progress. Still, the sage has also been highly controversial. For the past 100 years, East Asians have questioned if the region can become truly modern while Confucius remains so entrenched in society. He has been criticized for causing the inequality of

women, promoting authoritarian regimes, and suppressing human rights. Despite these debates, East Asians today are turning to Confucius to help them solve the ills of modern life more than they have in a century. As a wealthy and increasingly powerful Asia rises on the world stage, Confucius, too, will command a more prominent place in global culture. Touching on philosophy, history, and current affairs, Confucius tells the vivid, dramatic story of the enigmatic philosopher whose ideas remain at the heart of East Asian civilization.

'I believe that 'emotion' is where it's at' Tom Peters For far too long, emotions have been ignored in favour of rationality and efficiency, but breakthroughs in brain science have revealed that people are primarily emotional decision-makers. Many companies have not yet accepted that fact, much less acted on it. In this fully revised edition, *Emotionomics* will help you to understand emotions in terms of business opportunities - both in the marketplace and in the workplace. In today's highly competitive marketplace where many products look alike, it is the emotional benefit that can make the difference. At the same time, companies with engaged, productive work forces will undoubtedly achieve competitive advantage. Dan Hill's book draws on insights gathered through facial coding, the single best viable means of measuring and managing the emotional response of customers and employees, to help you to leverage emotions for business success in terms of branding, product design, advertising, sales, customer satisfaction, leadership and employee management. Emotions matter and *Emotionomics* will help you to step closer to customers and employees, but step ahead of your competitors.

A response to a time of anxiety about the future of society and a hunger for new ideas. The text starts from the position that our social structure is determined by human values. It questions present approaches to economic, environmental and social problems, and provides a view of the solutions required.

One of the U.S. government's leading China experts reveals the hidden strategy fueling that country's rise – and how Americans have been seduced into helping China overtake us as the world's leading superpower. For more than forty years, the United States has played an indispensable role helping the Chinese government build a booming economy, develop its scientific and military capabilities, and take its place on the world stage, in the belief that China's rise will bring us cooperation, diplomacy, and free trade. But what if the "China Dream" is to replace us, just as America replaced the British Empire, without firing a shot? Based on interviews with Chinese defectors and newly declassified, previously undisclosed national security documents, *The Hundred-Year Marathon* reveals China's secret strategy to supplant the United States as the world's dominant power, and to do so by 2049, the one-hundredth anniversary of the founding of the People's Republic. Michael Pillsbury, a fluent Mandarin speaker who has served in senior national security positions in the U.S. government since the days of Richard Nixon and Henry Kissinger, draws on his decades of contact with the "hawks" in China's military and intelligence agencies and translates their documents, speeches, and books to show how the teachings of traditional Chinese statecraft underpin their actions. He offers an inside look at how the Chinese really view America and its leaders – as barbarians who will be the architects of their own demise. Pillsbury also explains how the U.S. government has helped – sometimes unwittingly and sometimes deliberately – to make this "China Dream" come true, and he calls for the United States to implement a new, more competitive strategy toward China as it really is, and not as we might wish it to be. *The Hundred-Year Marathon* is a wake-up call as we face the greatest national security challenge of the twenty-first century.
