In this cogent analysis, Allen argues that Hitler rose to power primarily through democratic tactics that incited localized support rather than through violent means. Allen's detailed, analysis

has indisputably become a classic. Revised on the basis of newly discovered Nazi documents, *The Nazi Seizure of Power: The Experience of a Single German Town, 1922-1945* continues to significantly contribute to the understanding of this prominent political and moral dispute of the 1900s.

Allen's study of the rise and fall of Nazism in Germany chooses to concentrate on a single small town in Saxony, to see in detail how a civilised democracy could be plunged into a nihilistic dictatorship. A work of

the easy categories and genres that have characterized the field to date. Contributors pose new questions concerning the instability of the identity photograph in South Africa; ethnographic photographs as potential history; humanitarian discourse from the perspective of photographic survivors of atrocity photojournalism; the nuanced passage from studio to screen in postcolonial digital portraiture; and the burgeoning visual activism in West Africa. As the contributors show, photography is itself a historical subject: it

involves arrangement, financing, posture, positioning, and other kinds of work that are otherwise invisible. By moving us outside the frame of the photograph itself, by refusing to accept the photograph as the last word, this book makes photography an engaging and important subject of historical investigation. Ambivalent's contributors bring photography into conversation with orality, travel writing, ritual, psychoanalysis, and politics, with new approaches to questions of race, time, and postcolonial and decolonial histories.
