Filled with real-world examples and exercises, this practical resource presents more than 25 "tools" to apply critical thinking techniques to everyday business issues that are applicable across industries and functions, from individuals to senior executives.

A leading neuroscientist and New York Times-bestselling author of Mozart's Brain and the Fighter Pilot distills the research on the brain and serves up practical, surprising, and illuminating recommendations for warding off neurological decline, cognitive function, and encouraging smarter thinking day to day. In Think Smart, the renowned neuropsychiatrist and bestselling author Dr. Richard Restak details how each of us can improve and tone our body's most powerful organ: the brain. As a renowned expert on the brain, Restak knows that in the last five years there have been exciting new scientific discoveries about the brain and its performance. So he's asked his colleagues—many of them the world's leading brain scientists and researchers—one important question: What can I do to help my brain work more efficiently? Their surprising—and remarkably feasible—answers are at the heart of Think Smart. Restak combines advice culled from cutting-edge research with brain-tuning exercises to show how individuals of any age can make their brain work more effectively. In the same accessible prose that made Mozart's Brain and the Fighter Pilot a New York Times bestseller, Restak presents a wide array of practical recommendations about a variety of topics, including the crucial role sleep plays in boosting creativity, the importance of honing sensory memory, and the neuro- firing benefits of certain foods. In Think Smart, the "wise, witty, and ethical Restak" (says the Smithsonian Institution) offers readers helpful suggestions for fighting neurological decline that will put every reader on the path to building a healthier, more limber brain.

A relatable, interactive, and funny exploration of algorithms, those essential building blocks of computer science—and of everyday life—from the author of the wildly popular Bad Arguments Algorithms—processes that are made up of unambiguous steps and do something useful—make up the very foundations of computer science. But they also inform our choices in approaching everyday tasks, from managing a pile of clothes fresh out of the dryer to deciding what music to listen to. With Bad Choices, Ali Almosawi presents twelve scenes from everyday life that help demonstrate and demystify the fundamental algorithms that drive computer science, bringing these seemingly elusive concepts into the understandable realms of the everyday. Readers will discover how: • Matching socks can teach you about search and hash tables • Planning trips to the store can demonstrate the value of stacks • Deciding what music to listen to shows why link analysis is all-important • Crafting a succinct Tweet draws on ideas from compression • Making your way through a grocery list helps explain priority queues and traversing graphs • And more As you better understand algorithms, you'll also discover what makes a method faster and more efficient, helping you become a more nimble, creative problem-solver, ready to face new challenges. Bad Choices will open the world of algorithms to all readers, making this a perennial go-to for fans of quirky, accessible science books.

Develop clarity of thought. Avoid analysis paralysis. Make better decisions. Never miss a beat. Clear and effective thinking clashes with most of our instincts and habits. Think Like Einstein will shine a light onto the mistakes you've been making and show you how to defeat them once and for all. Learn to think outside the box. Think Like Einstein is a scientifically proven guide for improving your critical thinking skills and developing a sense of intuition and judgment. You will learn how to attack problems from a multitude of angles and generate solutions that previously seemed impossible. This book is not a simple list of tips - it is full of 100+ actionable insights into human psychology and action patterns. Discover what is holding you back from quick strategic thinking and decision making that can make huge differences in your life. Analyze situations, people, and data better. Peter Hollins has studied psychology and peak human performance for over a dozen years and is a bestselling author. He has worked with dozens of individuals to unlock their potential and path towards success. Create consistent flashes of insight in your daily life. -Discover the four types of obstacles to clear thinking. -What Mozart, Chess, and brain training programs mean for you. -How an ancient Greek method can help you discover your information gaps. -How to make optimal decisions with the given information. Work smarter; not harder. Improve your focus and productivity. -How to help your brain perform at its peak. -How to think creatively in any situation. -Understanding everyday data, statistics, and probabilities. -Einstein's most effective thinking technique. These are the skills that allow you to live the life you want. It was Socrates himself who once said, "The unexamined life is not worth living." When you can think effectively and creatively, you will be able to tackle your problems and take advantage of your opportunities. You will work faster than others, catch more mistakes, discover more insight, and create better outcomes and conclusions. Thinking better doesn't just help you in school or work - it helps you with people, fixing the toilet, and even deciding what to eat for dinner. You will be able to find the path of least resistance yet biggest impact consistently. You might not discover a new theory of relativity like the book's namesake, but you will gain a drastically different approach to life. Reach your brain's potential by clicking the BUY NOW button at the top of this page.

A revelatory and timely look at how technology boosts our cognitive abilities—making us smarter, more productive, and more creative than ever It's undeniable—technology is changing the way we think. But is it for the better? Amid a chorus of doomsayers, Clive Thompson delivers a resounding "yes." In Smarter Than You Think, Thompson shows that every technological innovation—from the written word to the printing press to the telegraph—has provoked the very same anxieties that plague us today. We panic that life will never be the same, that our attentions are eroding, that culture is being trivialized. But, as in the past, we adapt—learning to use the new and retaining what is good of the old. Smarter Than You Think embraces and extols this transformation, presenting an exciting vision of the present and the future.

The Freakonomics books have come to stand for challenging conventional wisdom; using data rather than emotion to answer questions. Now Levitt and Dubner have turned what they've learned into a readable and practical toolkit for thinking smarter, harder, and different - thinking, that is, like a Freak. Think Like a Freak offers rules like "Put Your Moral Compass in Your Pocket," "The Upside of Quitting," "Just Because You're Great at Something Doesn't Mean You're Good at Everything," and "If You Have No Talent, Follow Levitt's Path to Success."

Train your brain for better decisions, problem solving, and innovation Think Smarter: Critical Thinking to Improve Problem-Solving and Decision-Making Skills is the comprehensive guide to training your brain to do more for you. Written by a criticalthinking trainer and coach, the book presents a pragmatic set of tools to apply critical thinking techniques to everyday business issues. Think Smarter is filled with real world examples that demonstrate how the tools work in action, in addition to dozens of practice exercises applicable across industries and functions. Think Smarter is a versatile resource for individuals, managers, students, and corporate training programs. Thinking is the foundation of everything you do, but we rely largely on automatic thinking to process information, often resulting in misunderstandings and errors. Shifting over to critical thinking means thinking purposefully using a framework and toolset, enabling thought processes that lead to better decisions, faster problem solving, and creative innovation. ThinkSmarter provides clear, actionable steps toward improving your critical thinking skills, plus exercises that clarify complex concepts by putting theory into practice. Features include: A comprehensive critical thinking framework Over twenty-five "tools" to help you think more critically Critical thinking implementation for functions and activities Examples of the real-world use of each tool Learn what questions to ask, how to uncover the real problem to solve, and mistakes to avoid. Recognize assumptions you can rely on versus those without merit, and train your brain to tick through your mental toolbox to arrive at more innovative solutions. Critical thinking is the top skill on the wish list in the business world, and sharpening your ability can have profound affects throughout all facets of life. Think Smarter: Critical Thinking to Improve Problem-Solving and Decision-Making Skills provides a roadmap to more effective and productive thought.

As a runner, your biggest asset (or sometimes your greatest enemy) is your brain. What you think and feel on and off the road also has a huge influence over how you perform once you lace up. Runner's World The Runner's Brain shows you how to unlock and capture the miraculous potential of the body's most mysterious and intriguing organ and rewire your mind for a lifetime of athletic success. The book is based on cutting-edge brain science and sports psychology that author Dr. Jeff Brown uses every day in his private practice and as part of the medical team of several major road races including the Boston Marathon. Full of fascinating insights from runners of all abilities—including champion marathoner Meb Keflezighi and other greats—the book includes trustworthy information that's been proven to work both in the lab and on the road.

Think smarter, act smarter: this is the goal of the Sustainability Compass. It introduces 12 criteria for a sustainable lifestyle. Readers are invited to think about how these criteria can influence daily and extraordinary decision-making. How everybody can contribute to a sustainable society. "The questions of the Sustainability Compass gently help us realize that we WANT to live more sustainably." Bob Willard

\* Our summary is short, simple and pragmatic. It allows you to have the essential ideas of a big book in less than 30 minutes. By reading this summary, you will learn to think like Einstein, that is, to improve your reasoning, refine your judgment and draw the right conclusions in any situation. You will also learn to: make better decisions; improve your creativity and memory; find better solutions to your problems; stop being manipulated; avoid the most common thinking mistakes; use your intellect in the best possible way. Despite all the existing curricula, no one really learns how to think. Whether at elementary school or university, it is only a matter of regurgitating pre-mature knowledge. Yet there are ways to think better, make fewer errors in reasoning, make better decisions, and generally be smarter about what one chooses to believe. This is the whole point of this summary. \*Buy now the summary of this book for the modest price of a cup of coffee!
