Don't these boys get it? How many times must they get into trouble before they catch on? Best friends William and Thomas are back at it again with even more action and adventure. The poor community of Itchygooney isn't safe when William has a plan. This time there's an attack drone, a ghostly rocking chair, a slam-dunking wizard, and a UFO. Will these boys ever be stopped? Let's hope not! Back 4 More is the fourth book in the ongoing I Told You So series of humorous stories shared in short standalone bursts. If they were any longer you couldn't handle it!

The supercharger has become a modern, environmentally friendly and powerful piece of bolt on equipment. For anyone interested in installing a system or just learning about them, this book is a must have.'

Extracting maximum torque and horsepower from engines is an art as well as a science. David Vizard is an engineer and more aptly an engine building artist who guides the reader through all the aspects of power production and high-performance engine building. His proven high-performance engine building methods and techniques are revealed in this all-new edition of How to Build Horsepower. Vizard goes into extreme depth and detail for drawing maximum performance from any automotive engine. The production of power is covered from the most logical point from the air entering the engine all the way to spent gasses leaving through the exhaust. Explained is how to optimize all the components in between, such as selecting heads for maximum flow or port heads for superior power output, ideal valvetrain components, realizing the ideal rocker arm ratios for a particular application, secrets for selecting the best cam, and giving unique insight into all facets of cam performance. In addition, he covers how to select and setup superchargers, nitrous oxide, ignition and other vital aspects of high-performance engine building.
